AirScape | 650 kJ energy budget

(a) The video is egocentric/first-person perspective, captured from a camera mounted on a drone. The drone flew to the left at a constant altitude, and the camera captured several horses grazing or moving freely near the stream and the orange pond, without focusing on specific targets.

Ground truth	Proposed	ISCC-P2	AFL-OTA	F-SalUn
				
Video 154	GT rank: 1	GT rank: 4	GT rank: 2	GT rank: 4

(b) The video is egocentric/first-person perspective, captured from a camera mounted on a drone. The drone flies backwards and upwards while keeping the white pagoda centered in its field of view.
